

Incident Handler's Journal

Info:

Example Incidents and Events will be presented here for reference on diverse security scenarios.

Date: Record the date of the journal entry.	Entry: Record the journal entry number.
Description	Provide a brief description about the journal entry.
Tool(s) used	List any cybersecurity tools that were used.
The 5 W's	Capture the 5 W's of an incident. • Who caused the incident? • What happened? • When did the incident occur? • Where did the incident happen? • Why did the incident happen?
Additional notes	Include any additional thoughts, questions, or findings.

Date: 07/14/2025	Entry: 001
----------------------------	----------------------

Description	The attackers were able to gain access into the company's network by using targeted phishing emails, which were sent to several employees of the company. The phishing emails contained a malicious attachment that installed malware on the employee's computer once it was downloaded. Once the attackers gained access, they deployed their ransomware, which encrypted critical files. The company was unable to access critical patient data, causing major disruptions in their business operations. The company was forced to shut down their computer systems and contact several organizations to report the incident and receive technical assistance.
Tool(s) used	- Crowdstrike - Corologix - DefenseStorm - Proofpoint
The 5 W's	5 W's of an incident. ● Who: An internal user caused the incident. ● What: Due to a Ransomware attack all hospital systems and data were encrypted by a malicious actor preventing operations. ● When: Incident occurred on 07/14/2025 @ 0900 ● Where: Seattle Grace Hospital ● Why: A phishing link containing ransomware was clicked by an internal user causing a backdoor into our systems and thus giving the malicious actor leverage to carry out an attack.
Additional notes	Incident Response consisted of: - Immediate isolation of systems - No wiping of systems - Breach was reported to the following entities: - CISA (Cybersecurity & Infrastructure Security Agency) - FBI's Internet Crime Complaint Center (IC3) - HHS OCR (if patient data was exposed, per HIPAA breach

	notification rules) - Forensic Analysis was initiated - Investigation - Remediation - Response - Proactive Prevention - Proofpoint Training tools are used to inform users of the dangers, precautions, warnings, and consequences of email security.
